POMONA, Calif., Dec. 13.—Mrs. Katie Swain of this city was burned to death in a fire which destroyed her place of business, and damaged two adjoining buildings. The police, who believe the blaze was incendiary, are investigating the source of an alleged threatening letter written to Mrs. Swain last week.

The store building, occupied by Swain was the scene of a fire last Friday. Later in the day, it was said, Mrs. Swain received an anonymous letter in which, according to friends of the woman, it was declared the writer "would get her next time." SEATTLE, Dec. 13.—While flood waters in the streams of western Washington are reported receding somewhat as a result of lowered temperatures and a cessation of the heavy rains, conditions are still serious throughout the district and in some portions of eastern Washington traversed by streams from the Cascades. Transcontinental trains of the Great Northern, Chicago, Milwaukee and St. Paul and Northern Pacific lines are being detoured by way of the Columbia river and Vancouver, Washington, as a result of the washouts and bridges being carried away.

ANOTHER FIND REPORTED FROM CAMP ROYSTON

News of another rich mineral find in the Royston district was received in Tonopah today. This time one foot of solid ore has been encountered in the Frisco claim in the block of ground formerly known as the Forman lease, but which was sold to Rapp brothers of Los Angeles, has been announced and it is estimated that values of upwards of 700 ounces silver a ton will be found to be contained.

The ore was encountered at a depth of about eight feet, and the vein is gaining in width as development is carried forward. The ore is said to be almost identical in character with that found in the Betts lease on the Golden Eagle claim, and many contend that the Frisco over-shoot now exposed is a continuation of the shoot showing in the Betts workings. However, it is conceded that a junction of two veins occurs in the Betts shaft, and it is quite likely that the surmises of mining men that the Frisco and Golden Eagle veins junction at that point, are correct.

The Frisco claim is controlled by the Super Six Mining company, and active development on company account is being prosecuted, not to mention the fact that 11 sets of leasers are at work.

Storming two mines of the Central Coal and Coke company, they stopped the work, and drove 55 miners away. Red pepper and stones filled the air as the women, estimated at 2,000 rushed towards the miners' dinner buckets, and scattered the contents on the ground.

BIG DROP IN SILVER EXPORT DURING YEAR

(By Associated Press)
WASHINGTON, Dec. 13.—The new Quadruple treaty to preserve peace in the Pacific was formally signed today by the plenipotentiaries of the United States, Great Britain, France and Japan. The American official copy now goes to the White House for transmission by the president to the senate.

The signatures were affixed in the anteroom of the office of the secretary of state. There was no formal ceremony, no one being present except the plenipotentiaries, their secretaries and advisers. The American delegates, the first to sign under the alphabetical arrangement of the powers, put their names to the document and affixed their seals a few minutes after 11 o'clock.

Declaring that the new Four Power Pacific treaty had "all of the ingredients of the League of Nations with none of the virtues claimed for the document," Senator La Follette announced in a formal statement that he was prepared to "do all in my power to prevent its ratification."

An American reservation, attached to the Four Power treaty when signed today, contained a provision that the domestic questions of the various powers was not to be considered within the scope of the treaty. The reservation was in two parts, the first of which declares that the treaty shall in no way be binding as regards the policy of the United States towards the mandate islands in the Pacific.
